## **SECTION 1. INTRODUCTION & INVITATION FOR BIDS**

### ***1 Background & Introduction***

- 1.1 Uttar Pradesh Power Corporation Limited (“UPPCL” or “Procurer” or “Buyer”), on behalf of DISCOMS namely Paschimanchal Vidyut Vitran Nigam Ltd (“PVVNL”), Poorvanchal Vidyut Vitran Nigam Ltd. (“Pu.VVNL”), Madhyanchal Vidyut Vitran Nigam Ltd. (MVVNL”), Dakshinanchal Vidyut Vitran Nigam Ltd. (“DVVNL”) , Kanpur Electricity Supply Company Limited (“KESKO”), seeks to procure energy from energy storage systems, on an “On-Demand” basis under Tariff-based Competitive Bidding under “BOO” model and composite mode, suited to the requirements during the peak hours. In view of the above, the UPPCL hereby invites proposals for supply of energy from STU-connected Projects of Standalone Battery Energy Storage Systems (BESS) to be set up for an aggregate storage capacity of 1500 MWh (375 MW x 4 hrs) with single cycles charging/discharging operation of BESS with project to be located in the State of Uttar Pradesh connected with Uttar Pradesh State Transmission Utility (UP-STU). The cumulative capacity connected to the UP-STU shall be 1500 MWh (375 MW x 4 hrs). UPPCL shall enter into a Battery Energy Discharge Purchase Agreement (BEDPA) with the successful Bidders selected based on this RfS, for availing the Energy discharged from BESS as per the terms, conditions and provisions of the RfS and BEDPA.
- 1.2 With various global developments in technology and manufacturing, Renewable Energy (RE) has become the most affordable and cheapest source for meeting energy requirements. India has been expanding its installed RE capacity with the aim of reaching 500 GW by 2030. RE from sources like solar and wind is variable and not available round the clock like thermal power to meet the demand. Energy Storage Systems (ESS) are necessary to address this challenge by storing excess energy when not needed and supplying it during peak demand periods. As reliance on RE increases, the grid experiences stress during evening and morning peaks when sufficient RE is not available, necessitating additional power dispatch. ESS plays a vital role in successfully integrating RE into the grid and assisting grid operators in managing these fluctuations in demand and RE supply. ESS connected to solar pooling stations also help in maximizing the capacity utilization of RE transmission systems.
- 1.3 The above aspects rightly point out to the next course of direction of India’s energy planning methodology-integrating Energy Storage Systems (ESS) with existing and upcoming RE capacity in order to optimize generation mix while also better utilizing the transmission infrastructure in the country. With respect to increasing the storage component in the energy mix, CEA’s Report on identification of usage of storage as business case and for ancillary services, identifies Pumped Hydro Storage System (PSP) and Battery Energy Storage Systems (BESS) as the commercially deployed solutions for providing requisite storage capacity. CEA’s Report on Optimal generation capacity mix for the year 2029-30 (Version 2.0), released in April, 2023, envisages a total installed Battery Energy Storage capacity of 41,650 MW/208,250 MWh as part of the installed capacity in 2029-30. This will be in addition to 18,986 MW of Pumped Hydro Storage System envisaged to be a component of the installed capacity in 2029- 30.
- 1.4 Going forward, the planning process for transition to a greener energy mix in the country would entail integrating the planned Renewable capacity into India’s energy grid while ensuring its safety and reliability. Apart from Pumped Hydro Storage Plants, BESS are envisaged to be

significant element of the future grid with increased share of renewable energy in accordance with the target of 500 GW of non-fossil-based capacity to be installed by 2030. BESS assets can provide the required flexibility in generation apart from ensuring the resource adequacy. Besides, Energy Storage Systems also have the potential to enable better utilization of the country's transmission network and reducing network infrastructure footprint.

#### 1.5 Guidelines for Implementation of the RfS

This RfS document has been prepared based on the Guidelines for “Procurement and Utilization of Battery Energy Storage Systems as part of Generation, Transmission and Distribution assets, along with Ancillary Services”, issued by Ministry of Power vide Gazette Notification dated 10.03.2022 and subsequent amendments and clarifications issued thereto until the bid submission deadline for this RfS and Guidelines for Viability Gap Funding (VGF) Scheme for development of Battery Energy Storage Systems (BESS) supported through Power System Development Fund (PSDF) dated 09<sup>th</sup> June 2025, Amendment in Operational Guidelines for viability Gap Funding Scheme for development of Battery Energy Storage System supported through Power System Development Fund (PSDF)-reg. dated 04<sup>th</sup> August 2025, Minutes of Meeting dated 13<sup>th</sup> August 2025 and subsequent clarifications and amendments issued by Ministry of Power. **8.1 Project performance parameters**

- a. The Contracted energy from the BESS Project of Capacity “MW” (also referred to as the Project Capacity) shall be in terms of “kWh/ MU” Buying Entity obligation shall be for off-take discharge energy at Delivery point.
- b. For example, for a Project Capacity of 100 MW/400 MWh, Contracted Capacity shall be 100 MW/400 MWh under the BEDPA. Accordingly, for a Contracted Capacity of 100 MW, the BEDPA shall entitle the off taker to schedule discharge upto 400 MWh of energy from the BESS in a cycle, subject to the following:
  - i. Energy scheduled for discharge in a given cycle during a year shall be more than or equal to the Min. Dispatchable Energy Capacity at the End of Year as specified in Clause 8.1.e.v. below.

Contracted energy from the contracted capacity shall be the energy discharged by the BESS project at delivery point. Arrangement/ supply of Charging power shall be in the scope of BESSD.

- c. In case UPPCL offtakes partial energy or does not offtake any energy, BESSD is eligible for sale of energy to third party as per RfS clause 8.1 e iv. The BESS shall adhere to the specifications and performance requirements laid out in Annexure-A of the RfS in this regard.
- d. Power rating of a 1500 MWh (375 MW x 4 hrs) BESS will be 375 MW, i.e., the maximum value of the active output at the Delivery Point. The Energy rating of 1500 MWh of the system will be the dispatchable capacity at COD of the system considering degradation of BESS as provided in RfS, as measured at the Metering Point. Terms and definitions of terminologies related to BESS shall be as defined in IEC 62933-2-1.
- e. The BESSD shall make the BESS available for 1 operational cycles per day, i.e. 1 complete charge-discharge cycle per day. Following provisions shall be applicable on the entire discharged energy guaranteed to be off taken by Buying Entity:
  - i. The procurement shall be in energy (kWh) terms. The BESSD shall install, operate and maintain the BESS to offer facility to Buying Entity to discharge the BESS on an “on demand” basis.

It is to clarify that there shall be no discharging from BESS by Buying entity between 11:00 hrs to 17:00 hrs. However, if 4 hour discharging session has been completed by Buying Entity in one or two sessions, BESSD is allowed to start charging activity immediately after completion of 4 hours of discharging and considering the cooling time for BESS as per RfS provisions. The next discharging cycle shall start from 18:00 hrs onwards considering 1 hour cooling time.

The BESSD shall guarantee a minimum system availability of 95% on monthly basis. The BESSD shall pay the liquidated damages for such shortfall and shall duly pay such damages to the UPPCL. Amount of such liquidated damages shall be 1.5 times the

- discharge energy tariff for the discharge energy not made available during the month.
- ii. Buying Entity, at its discretion, can split the discharge of the stored energy into one or two sessions, but not more than two.

It is hereby clarified that the BESS should be designed to provide a maximum of 4 hours of discharging capacity. However, Buying Entity, at its sole discretion, can schedule the discharging of the BESS in one or two sessions each day except during the Charging Window provided to BESSD to charge the BESS i.e. from 11:00 hrs to 17:00 hrs.

Illustrations:

S No.	Session-I	Session-II
1	4 hours	-
2	3 hours	1 hour
3	2 hours	2 hours
4	1 hour	3 hours

- iii. “Availability” of the Project shall mean the ability of the BESS to execute a function i.e. discharging, when called upon to do so, against the Drawl requisition provided by the off-taker, subject to the minimum system ratings specified herein. In addition, the BESSD shall also demonstrate, on annual basis, 100% of the minimum dispatchable capacity of the BESS as required under Clause 8.1.e.iv below.

For a given BEDPA, the Monthly availability guarantee shall commence from the date of commissioning of the system and shall be calculated as below:

**Monthly System Availability = Mean of the System availabilities of all time-blocks during the month in which the off-taker has scheduled power for discharging the BESS.**

Where,

System Availability in a Month =

$$\frac{\text{Actual Drawl Schedule } MU_i(A)}{\text{On Demand Drawl Requisition } MU_i(B)}$$

where

- a) Actual Drawl Schedule (in MU) is the Actual Schedule for Discharging in the  $i^{\text{th}}$  Month
- b) On Demand Drawl Requisition in MU is the Energy requisitioned by off taker for Discharging in the designated hours in  $i^{\text{th}}$  Month (commensurate to annual degraded capacity)

Drawl requisition for the month in a particular year of operational Life (In MUs rounded off up to decimal places) = ((MDAE)/365) x n

Where MDAE is Minimum Dispatchable annual energy in the year of operational life as specified in Clause 8.1. e. (v).

And n is the number of days in that particular month for which availability is being calculated.

For example:

For a 250 MW/1000 MWh capacity,

In 3rd year of operational life, drawl requisition for March month shall be calculated as below:

MDAE = 347 MUs, n = 31 Days

Drawl Requisition for the Month =  $(347/365) * 31 = 29.47$  MU

- c) A and B shall be as per the DSM/UI/REA Reports published by the Regional RPCs or measurement at the Main ABT Meter at the Point of Interconnection. System Monthly availability shall be calculated as per above. The liquidated damages for **system availability below 95%** shall be settled on monthly basis and if it is not able to settle in the same/ current month, it will be carried forward for settlement in subsequent month(s).
- iv. Buying Entity shall assure 100% offtake of total energy corresponding to the declared capacity from BESS except in circumstances arising due to grid unavailability, or any Force Majeure event.

In case of inability to offtake power by buying entity excluding circumstances arising due to grid unavailability or any Force Majeure event, the buying entity shall remain liable to pay 100% of the applicable tariff on total energy corresponding to the declared capacity.

The BESSD shall offer the un-requisitioned power at power exchange at price taker basis or to third party. If the un-requisitioned power is not offered by BESSD, then buying entity shall not be liable to pay applicable tariff corresponding to the un-requisitioned power as mentioned above.

In case of sale through power exchange/third party, revenue after deducting applicable expenditure shall be first adjusted against the above payment due from the buying entity corresponding to the un-requisitioned power. Any gain thereafter shall be shared equally between Buying entity and the BESSD (50:50).

In case, if BESSD delivered less energy than requisitioned by UPPCL, UPPCL shall be liable to pay only the applicable tariff corresponding to the actual energy discharged from the BESS. Gain sharing shall be done on quarterly basis based on the applicable obligation report/contract documents. Declaration with respect

to gain sharing along with CA certification shall be submitted by BESSD on yearly basis.

The example calculation for various scenarios is illustrated in illustration A.

Note:

- The Scheduled capacity shall be subject to the System Power Rating specified in Clause 8.1.a. above.
  - The BESSD shall take separate, metered connection for the Auxiliary Power load of BESS or The BESSD can draw auxiliary power from Interconnection point. Separate meter would be arranged by BESSD to measure auxiliary consumption which will be billed by the relevant DISCOM. Arrangement of power for auxiliary consumption is under scope of the BESSD.
- v. Taking into consideration capacity degradation, the minimum dispatchable energy to be made available by the BESSD during given year shall be as follows:

Revised Table attached as Table A

- vi. The nameplate ratings shall be achievable during discharge for the full range of environmental conditions at the project site when the battery is fully charged. In any case, the BESS shall be capable of being discharged at reduced power levels from that specified above. However, the energy discharged from the battery shall not require to be greater than the nameplate watt-hour rating specified herein. For example, at the end of the 3rd Year after COD, the energy scheduled for discharge from 250 MW capacity shall be more than or equal to  $250 \times 0.94 \times 4 = 940$  MWh.
- vii. Buying Entity shall, in accordance with Applicable Laws and Regulations thereunder, issue instructions to the BESSD for despatch of electricity to the Grid during such period and in such volume as it may specify in its instructions. The BESSD shall clearly specify the maximum recovery time required to restore the BESS for functional availability between duty cycles. The maximum allowed cooling time between Charge to Discharge or Discharge to charge would be 1 hr. BESSD shall have the time-window for charging of BESS for consecutive and minimum 4 hours in solar hours.
- viii. Operational Window: Operational Window shall mean the expected hours/duration of system (capacity) availability on each day during the term of the Contract, excluding:
  - a. Maximum BESS recovery time as specified in this document
  - b. Grid Outages (duly certified to this effect by the Grid Operator)
  - c. Planned Maintenance Outage duly informed by the BESSD to the off-taker with at least one month's prior notice, subject to total no. of planned outage period being not more than 34 hours in a two-month period.
- ix. BESSD will have to comply with the Discharging Schedule as intimated by Buying Entity.  
In addition to above, the BESSD shall also submit Available energy Test Report for the Project Capacity as per IEC 62933-2-1 on Annual basis.
- x. It shall be the responsibility of the BESSD to make periodic replacements/replenishments of system capacities at its own cost to ensure annual guaranteed system ratings, if and when required, up to the Term of the Contract. Outage time as a result of replacement will also be counted as an "Accountable BESS Outage" for the purpose of computing BESS Availability.

- f. Pursuant to the provisions as above, the BESSD shall plan the despatch of electricity and convey its availability for scheduling thereof to the SLDC or RLDC and shall supply electricity in accordance with the provisions of the Grid Code and the Electricity Act, 2003. The BESSD shall adhere to all the technical requirements as brought out in Annexure-A of the RfS. The BESS shall conform to all the applicable CEA and CERC Standards for connectivity, metering, communication with the grid operators, etc and CERC/SERC Regulations.

## 8.2 **Shortfall in meeting Performance Criteria**

Following provisions shall be applicable on the Contracted Capacity to be offtaken by UPPCL:

- i. Shortfall in demonstrating minimum Availability: Subsequent to COD of full Project/Contracted Capacity, in case the monthly Availability demonstrated by the BESSD is less than the minimum as specified above, such shortfall in performance shall make the BESSD liable to pay the liquidated damages provided in the BEDPA to UPPCL.

Liquidated damages on account of shortfall in meeting the minimum system Availability criteria (i.e.,  $B < A$ ) as per Clause 8.1.e.i., will be computed as follows:

**Liquidated damages in Rs.=  $(A - B) \times C \times 1000 \times D \times 1.5 \times n$  where,**

A is Guaranteed Monthly Availability as per Clause 8.1.e.i. above (in %);

B is Actual Monthly System Availability, as calculated as per Clause 8.1.e.iii. above (in %);

C is BESS Power Capacity (in MWh);

D is discharge energy tariff (Rs/kWh) as discovered through bidding process;

n is the number of days in that particular month for which availability is being calculated

It is clarified that the calculation of Availability as per Clause 8.1.e.(iii) of the RfS will not include the planned outage as declared by the BESSD under Clause 8.1.e (viii) of the RfS. However, in case the BESSD notifies any outage outside the planned outage hours, while the Buying Entity may not actually schedule any power injection/drawl during those outage hours, such hours will be covered in calculating the Annual Availability as per Clause 8.1.e.(iii). For example, in case the BESSD notifies outage for 10 hours outside the total allocated quota of planned outage amounting to  $(34 \times 6)$  hours, i.e. 204 hours, the denominator of the formula in Clause 8.1.e (iii) above will include the time-blocks corresponding to these 10 hours, and exclude the 204 hours of planned outage. However, this damage shall not be applicable in events of Force Majeure identified under the BEDPA with the Buying Entity, affecting the availability of the system. An illustration to this effect is enclosed at Annexure-D of the RFS.

## 9 *Commissioning of Projects*

The Commissioning of the Project shall be carried out by the BESSD in line with the procedure as per the BEDPA. UPPCL may authorize any individual or committee or organization to witness and validate the commissioning procedure on site. Commissioning certificates shall be issued by UPPCL after successful commissioning. The BESSD shall obtain necessary safety clearances from the Central Electricity Authority/CEIG prior to commissioning of the Project.

### 9.1 **Part Commissioning**

Part commissioning of the Project, without prejudice to the imposition of any liquidated damages in terms of the BEDPA on the part which is not commissioned, shall be accepted by the Buying

Entity subject to the condition that the minimum part commissioning capacity for the 1<sup>st</sup> part will be 50% of Project Capacity or 50 MW, whichever is lower. The total number of instalments in which a Project can be commissioned will not be more than 3, i.e., 1st initial instalment of 50 MW and 2 subsequent instalments. However, the SCD will not get altered due to part commissioning. Irrespective of dates of part commissioning or full commissioning, the BEDPA will remain in force for a period as per Clause 22.4 of the RfS.

## 9.2 **Commissioning Schedule and Penalty for Delay in Commissioning**

- a. The Scheduled Commissioning Date (SCD) for commissioning of the full capacity of the Project for the Substation interconnection point shall be 18 months from the Effective Date of BEDPA (for e.g. if Effective Date of the BEDPA is 05.03.2025, then SCD shall be 05.09.2026).
- b. The maximum time period allowed for commissioning of the full Project Capacity with applicable penalty, shall be limited to the date as on 6 months from the SCD or the extended SCD (if applicable).
- c. In case of delay in commissioning of the Project beyond the SCD until the date as per Clause 9.2.b. above, as part of penalty, the total PBG/POI amount for the Project shall be encashed on per-day-basis and proportionate to the balance capacity not commissioned. For example, in case of a Project Capacity of 125 MW capacity, if commissioning of 100 MW capacity is delayed by 18 days beyond the SCD, then the penalty shall be calculated as:  $PBG \text{ amount} \times (100/125) \times (18/180)$ . For the purpose of calculations of penalty, 'month' shall be considered consisting of 30 days.
- d. As an alternative to the above encashment of PBG/POI, the BESSD may choose to make a payment of the amount corresponding to the penalty, directly to UPPCL. The BESSD shall intimate to UPPCL, its chosen alternative out of the two options, within 10 business days of intimation of the penalty amount to the BESSD, as calculated by UPPCL. In case no response is received from the BESSD until the lapse of the above deadline, UPPCL shall encash the PBG/POI for the amount as per the penalty.
- e. In case the Developer chooses to make necessary payments in lieu of the penalty, the said payment shall be credited to UPPCL account through NEFT payment, no later than 5 business days from the above intimation by the BESSD. In case of non-payment by the developer within the above deadline, the PBG will be encashed by UPPCL on the next business day.
- f. In case Commissioning of the Project is delayed beyond the date as per Clause 9.2.b above, following shall be applicable:
  - i. The BEDPA capacity shall stand reduced/amended to the Project Capacity commissioned until the deadline as per Clause 9.2.b. above, the entire PBG/POI will be encashed by UPPCL, and the BEDPA for the Project shall stand terminated for the balance un-commissioned capacity.
- g. It is clarified that for the purpose of commissioning, the Project Capacity shall refer to the rated capacity of the Energy Storage System as declared by the BESSD in the BEDPA. Any reduction in the Project Capacity on account of Clause 9.2.e. above, will have no bearing on the obligation of the BESSD to provide the Contracted Energy as per the BEDPA.

- h. It is to be noted that delay in commissioning / operationalization of the ESS charging source, shall not be admissible among the factors warranting an extension in SCD of the Project.

#### ***10 Delay in Commissioning on Account of Delay in readiness of ISTS evacuation infrastructure/Grid Access Operationalization***

Subsequent to grant of connectivity, in case there is a delay beyond SCD of the Project, in readiness of the STU substation at the Delivery Point, including readiness of the power evacuation and transmission infrastructure of the STU network until SCD of the Project, or delay in grant/operationalization of Grid Access, and it is established that:

- I. The BESSD has complied with the complete application formalities as per Clause 7 above,
- II. The BESSD has adhered to the applicable Regulations/Procedures in this regard as notified by the SERC/STU, and
- III. The delay in grant of connectivity by the STU and/or delay in readiness of the STU substation at the Delivery Point, including readiness of the power evacuation and transmission infrastructure of the STU network, is a factor attributable to the STU/transmission licensee and is beyond the control of the BESSD;

The above shall be treated as delays beyond the control of the BESSD and SCD for such Projects shall be revised as the date as on 30 days subsequent to the readiness of the Delivery Point and power evacuation infrastructure and/or operationalization of the Grid Access. Decision on requisite extension on account of the above factor shall be taken by UPPCL.

In case of delay in commissioning of Project due to reasons beyond the reasonable control of the BESSD, UPPCL may extend the SCD after examining the issue on a case-to-case basis.

#### ***11 Early Commissioning***

The BESSD shall be permitted for full commissioning as well as part-commissioning of the Project even prior to the SCD. Early commissioning of the Project will be allowed solely at the risk and cost of the BESSD, and UPPCL may purchase the energy from such early commissioned Project at the BEDPA charges (for the Contracted Capacity). The developer shall give fifteen (15) days advance notice to UPPCL regarding the advance commissioning of full or part capacity. UPPCL shall give acceptance for availing such capacity within 15 days from the date of service of notice. In case UPPCL do not give their acceptance to purchase energy within the stipulated period, the developer can sell the energy to the extent not accepted by UPPCL in the power exchanges or through bilateral arrangements.

If the BESS energy is not off taken by the Buying entity upon early commissioning, BESSD shall arrange for any augmentation of the Battery capacity to meet the capacity criteria mentioned at the time of SCD (i.e. dispatchable capacity on SCD date shall be 100% of the Contracted Capacity) and to maintain the capacity at the end of every year as indicated in Clause 8.1.e of the RfS. Subject to the provisions of the BEDPA, in case of early commissioning, if BESSD sells any power/ capacity to a third party or to Buying Entity, the BESSD will have to again demonstrate 100% of Contracted Capacity (as per the Commissioning Procedure) to the Buying

Entity from the date of commencement of off-take of energy by the Buying Entity or SCD, whichever is later.

## **12 Viability Gap Funding Mechanism**

- 12.1 In line with the sanction order issued by the Ministry of Power dated 09.06.2025 and subsequent amendments and clarifications issued by Ministry of Power, Government of India, Projects selected under this RfS will be eligible for grant of Viability Gap Funding (VGF) support by the Government for development of Battery Energy Storage Systems, and the same will be disbursed through the Buying Entity.
- 12.2 Under this RfS, the VGF amount eligible for each Developer towards setting up battery energy storage system (Project) shall be limited to the amount calculated @ **Rs. 18,00,000/MWh (Rupees Eighteen Lakhs per MWh)**. BESS Developer shall submit certificate for the capital cost incurred for the BESS Project (Excluding RE Project Cost, if any) capacity, duly certified by the Statutory Auditors, within six months from the COD.
- 12.3 VGF will be sanctioned separately for each Project, based on the Project Capacity as defined in the respective BEDPA.

On financial closure, subject to submission of bank guarantee.	20
On Commercial Operation Date (COD)	50
Completion of 1st year from COD	30
<b>Total</b>	<b>100</b>

- 12.5 The VGF for each project shall be disbursed to the Buying Entity, once the CEA certifies the achievement of the disbursement schedule milestone and submission of the required electronic Bank Guarantee by BESSD. Buying Entity shall disburse the tranche wise VGF to BESSD only after receipt of the same from the Govt. of India and submission of e-BG by BESSD as per Clause 12.6.
- 12.6 Electronic Bank Guarantee: Each tranche of VGF will be disbursed only after submission of electronic Bank Guarantees (e-BG) for the to the BESSD in that tranche. These e-BGs are in addition to the Performance Bank Guarantee provided by the developer as per clause 19 of this RfS. This e-BG shall be liable for encashment to recover the VGF amount in the event of non-fulfilment of the scheme conditions specified in the Bidding Documents. The e-BGs for the VGF sanction up to the COD shall be release within one year from the COD while the e-BGs for the VGF sanction after the COD shall be release within three years from the COD, taking into account recovery of VGF, if any
- 12.7 Omitted.
- 12.8 In the event of non-fulfilment of the scheme conditions specified in the Bidding Documents as well as the guidelines (please refer to clause 1.5 of this document), the Buying Entity will have

the right to recover the VGF disbursed amount through encashment of BG.

- 12.9 If the Project is transferred or sold to a third party during the above tenure, the e-BG will be re-issued by the new entity, corresponding to the amount applicable. The sale/transfer of the Project shall be effective only on submission of e-BG by new entity. However, this will be subject to prior approval of sanctioning authority of Grants-in-Aid {Rule230(9)}, in view of the asset being acquired substantially out of Government Grants.
- 12.10 The bidders are required to bid only for one tariff considering only Viability Gap Funding (VGF) support by the Government of India @ INR 18 Lakh/MWh.
- 12.11 Under this RfS, the Capital State Subsidy as per Uttar Pradesh Solar Energy Policy-2022 is not applicable. For e.g., for a 200 MWh (50 MW x 4 hrs) Project Capacity, the minimum Net Worth requirement to be demonstrated shall be Rs. 89.60 lakh x 50 MW = Rs. 44,80,00,000.

- 39.4** For the purposes of meeting financial requirements, only latest unconsolidated audited annual accounts shall be used.

However, audited consolidated annual accounts of the Bidder may be used for the purpose of financial requirements, provided the Bidder has at least twenty six percent (26%) equity in each Company whose accounts are merged in the audited consolidated account.

## **SECTION 4. BID EVALUATION AND SELECTION OF PROJECTS**

### **40 *Bid Evaluation***

Bid evaluation will be carried out considering the information furnished by Bidders as per provisions of this RfS. The detailed evaluation procedure and selection of bidders are described in subsequent clauses in this Section.

### **41 *Techno-Commercial Evaluation of Bidders (Step 1)***

41.1 The first envelope (Technical Bid submitted online) of only those bidders will be opened by UPPCL whose required documents as mentioned at Clause 30 of the RfS are received by UPPCL. Bid opening (online) will be done only after the deadline for submission of e-Bank Guarantee (if applicable) and/or DDs/Pay order against Cost of RfS document and Bid Processing Fee.

For e.g., if the bid submission deadline is 18:00 hrs on 22.04.2025, the online bid opening will be conducted on 24.04.2025. In case of the above deadline being a holiday, the bids will be opened on the next working day.

41.2 Subject to Clause 29 of the RfS, UPPCL will examine all the documents submitted by the Bidders and ascertain meeting of eligibility conditions prescribed in the RfS. During the examination of the bids, UPPCL may seek clarifications/additional documents to the documents submitted etc. from the Bidders if required to satisfy themselves for meeting the eligibility conditions by the Bidders. Bidders shall be required to respond to any clarifications/additional documents sought by UPPCL within 02 (two) or such no. of days as specified by UPPCL from the date of such intimation from UPPCL. All correspondence in this regard shall be made through email / (<https://www.bharat-electronictender.com>) only. It shall be the responsibility of the Bidder to ensure that the email id of the authorized signatory of the Bidder is functional. The Bidder may provide an additional email id of the authorized signatory in the covering letter. No reminders in this case shall be sent. It shall be the sole responsibility of the Bidders to remove all the discrepancies and furnish additional documents as requested. UPPCL shall not be responsible for rejection of any bid on account of the above.

41.3 The response to RfS submitted by the Bidder shall be scrutinized to establish Techno-Commercial eligibility as per the RfS.

41.4 In case of bidder who is eligible for a specified capacity (in MW) as per QR and quotes for more than that specified capacity, then capacity for such bidder shall be restricted to this specified capacity for bid evaluation purpose, keeping the quoted price per KWh unchanged.

### **42 *Financial Bid Evaluation (Step 2)***

42.1 In this step evaluations of Techno-Commercially Qualified Bids shall be done based on the “Discharge Energy Tariff”, quoted by the Bidder in the Financial Bid. After this step, the shortlisted bidders shall be invited for the Reverse Auction. **The “tariff” in this section, will refer to the discharge energy tariff quoted by the bidders.**

42.2 Second Envelope (containing Discharge Energy Tariff) of only those bidders shall be opened whose technical bids are found to be qualified as per the RfS.

42.3 The Bidder including its Parent, Affiliate or Ultimate Parent or any Group Company will have to submit a single bid (single application) quoting a single tariff (discharge energy tariff) in Indian Rupee per kWh for all the Projects applied for. If it is quoted with more than two decimal places, the digits after the second decimal places shall be ignored. (For e.g. if the quoted tariff is INR 5.456/kWh, then it shall be considered as

INR 5.45/kWh).

- 42.4 In this step, evaluation will be carried out based on tariff quoted by the Bidders.
- 42.5 On completion of Techno-Commercial bid evaluation, to ensure competitiveness, the minimum number of qualified Bidders to participate in the e-Reverse Auction should be two. If the number of qualified Bidders is less than two, even after three attempts of bidding and UPCCL still wants to continue with the bidding process, the same may be done with the consent of the Appropriate Commission.
- 42.6 If the first-round tariff quoted is same for two or more Bidders, then all the Bidders with same tariff shall be considered of equal rank/ standing in the order.
- 42.7 All Bidders with same tariff shall be eligible for reverse auction round (provided their rank is equal to or less than  $n^{\text{th}}$  Bidder as mentioned in Clause 43.2 of the RfS).
- 42.8 Ranking of bidders after Financial Bid Evaluation: Following illustrates an example of ranking of bidders after financial bid opening and evaluation

<b>Bidder</b>	<b>Submitted Financial Bid</b>	<b>Ranking</b>
B1	Rs. 5.19 (Tariff in Rs./ kWh)	L1
B2	Rs. 5.21 (Tariff in Rs./ kWh)	L2
B3	Rs. 5.24 (Tariff in Rs./ kWh)	L3
B4	Rs. 5.27 (Tariff in Rs./ kWh)	L3
B5	Rs. 5.31 (Tariff in Rs./ kWh)	L4
B6	Rs. 5.36 (Tariff in Rs./ kWh)	L5
B7	Rs. 5.39 (Tariff in Rs./ kWh)	L6
B8	Rs. 5.44 (Tariff in Rs./ kWh)	L7
B9	Rs. 5.49 (Tariff in Rs./ kWh)	L8

### 43 Reverse Auction (Step 3)

- 43.1 The reverse auction for the total tendered capacity shall be conducted on the portal <https://www.bharat-electronictender.com>, on the day as intimated by UPPCL to the eligible Bidders.
- 43.2 The Total eligible Bidders for the reverse auction shall be decided as mentioned below:

Assuming

$T$  = Total Techno-Commercially Qualified Bidders, and

$S_k$  = Cumulative capacity till the 'k'th serial number bidder (not the 'k'th rank bidder) after ranking is done in ascending order from the lowest price bid, or "L1 bid" onwards

$S_E =$ (Eligible capacity for award)	(i) In case $S_T > 375$ MW, $S_E = 375$ MW (ii) In case $S_T \leq 375$ MW, $S_E = S_T$
--	---

**Total eligible Bidders for e-Reverse Auction**

- i. In case  $S_E \leq 375$  MW: all the techno-commercially qualified bidders whose financial bids are in line with the RfS provisions, will be shortlisted for e-RA. Accordingly, the no. of bidders shortlisted for e-RA, i.e., “n” = “T”.
- ii. In case  $S_E > 375$  MW: The lowest ranked bidder, i.e. the bidder quoting the highest tariff (the “H1 bidder”) shall be eliminated at this stage, and the remaining techno-commercially qualified bidders whose financial bids are in line with the RfS provisions, will be shortlisted for e-RA. Accordingly, the no. of bidders shortlisted for e-RA, i.e., “n” = “T”-1

**Note:**

(a) In case more than one bidder is ranked as “H1” bidder, i.e. such bidders are at the same tariff, all such bidders will be eliminated at this stage.

(b) The above elimination will take place subject to the condition that the total bid capacity after such elimination remains more than 375 MW. In the contradictory scenario, no elimination will take place at this stage.

**For e.g. (Shortlisting of Bidders for reverse auction):**

Scenario-1: Total bid capacity of techno-commercially shortlisted bidders =  $S_T=500$  MW

S. No.	Techno commercially qualified Bidder	Rank	Capacity (MW)	T	$S_E$	n	Shortlisted Bidders
1	B8	L1	125	5	375 MW	4*	B8
2	B5	L2	125				B5
3	B1	L3	50				B1
4	B4	L3	75				B4
5	B2	L4	125				

\*  $n = 5 - 1 = 4$  as per the above formula.

Scenario-2: Total bid capacity of techno-commercially shortlisted bidders =  $S_T=450$  MW

S. No.	Techno commercially qualified Bidder	Rank	Capacity (MW)	T	$S_E$	n	Shortlisted Bidders
1	B8	L1	125	3	375 MW	3	B8
2	B5	L2	200				B5
3	B1	L3	125				B1

\* since if  $n=T-1$ , total capacity is not more than 375 MW,  $n = 3$  as per the above formula

43.3 After opening of financial bids and at least one day prior to reverse auction, an advance intimation regarding the date and time of the reverse auction will be sent by e-mail to all the bidders whose technical bids have been opened and are found to be qualified. Further, at least two hours before the scheduled start time of Reverse Auction, a system generated email for invitation for Reverse Auction will be sent to all those bidders only who have been shortlisted based on the criteria mentioned at Clause 43.2 above.

- 43.4 Shortlisted bidders for Reverse Auction will be able to login into the <https://www.bharat-electronictender.com> of reverse auction 15 minutes before the start time of reverse auction.
- a. During the 15 minutes prior to start of reverse auction process, the respective tariff of the bidder shall be displayed on its window.
  - b. The minimum decrement value for tariff shall be **INR 0.01 per kWh**. The Bidder can mention its revised discounted tariff which has to be at least 01 (one) paisa less than its current tariff.
  - c. Bidders can only quote any value lower than their previous quoted tariff taking into consideration the minimum decrement value mentioned in the previous clause. However, at any stage, increase in tariff will not be permissible. Bidders can improve their ranking by quoting the tariff lower than their last quoted tariff.
  - d. During reverse auction, the Bidder shall not have the option of changing the total project capacity while quoting tariff during reverse auction.
  - e. In the bidder's bidding window, the following information can be viewed by the bidder:
    - i. Its tariff as the initial start price and there after last quoted tariff along with the project capacity for which the Bidder is qualified.
    - ii. The list of all the Bidders with their following details: Pseudo Identity, last quoted tariff and project capacity

#### **44 Selection of Successful Bidders**

- 44.1 Subsequent to conclusion of the e-RA process, the bidders will be listed in the increasing order of the tariffs discovered at the end of e-RA.
- 44.2 The bidders who fall within the range of (and including) the lowest tariff (L1 tariff) + 2% of the L1 tariff- hereinafter referred to as "the range"- will be declared as Successful Bidders under the RfS, subject to the following conditions:
- i. In case the cumulative capacity shortlisted as per the range exceeds  $S_E$  (capacity eligible for award as per Clause 43.2 above), the list of Successful Bidders shall be limited by  $S_E$ .
  - ii. In a borderline case, i.e. the scenario wherein more than one Bidder is eligible to be declared as Successful Bidder at the highest tariff (the tariff at the end of the range), and the cumulative capacity exceeds  $S_E$ , time stamping of bids shall be used to limit allocation of cumulative capacity up to  $S_E$ . In such cases, those Bidders who are at the same tariff, but they are ranked lower than the ones which fall within the cumulative capacity limit of  $S_E$ , will not be eligible to be declared as Successful Bidders.

In other words, in every possible scenario, the total capacity to be awarded under the RfS shall be limited to  $S_E$ .
  - iii. Time stamping- In case of a tie among two or more Bidders (i.e. their last quoted tariff being the same), they will be considered in the chronological order of their last quoted tariff during the e- RA with preference to be given to that Bidder who has quoted his last tariff during the e-RA, earlier than others.

iv. In the above case, if the time of quote also becomes exactly same among the Bidders at a tie, then the ranking among these Bidders shall be done as follows:

- Step 1: Highest rank (i.e L1) will be given to the Bidder who has quoted the lowest in Financial Bid (Electronic Form) and so on. If there is also a tie among any of these bidders, then the following step (Step 2) will be followed.
- Step 2: Ranking will be done based on draw of lots.

44.3 **Illustration:** Following example provides a possible illustration of the above methodology:

- L1 tariff discovered after e-RA: Rs. 5.02/kWh
- Tariff as per the range (L1+2% of L1): Rs. 5.12/kWh

Rank	Quoted Capacity (MW)	Cumulative Quoted Capacity (MW)	Time stamp	Tariff (INR/kWh)	Qualified Successful Bidder
L1	125	125	NA	5.20	L1
L2	50	175	NA	5.23	L2
L3	75	250	16:00:01	5.29	L3
L3	125	375	16:00:02	5.33	L4
L4	100	475	NA	5.37	---

44.4 Note: The allocation of cumulative project capacity shall be closed at  $S_E$ . In case of the last selected Bidder, if the balance project capacity is less than the total capacity mentioned by the Bidder, then the Project with highest preference (as mentioned in the Covering Letter) shall be awarded to the Bidder, subject to the maximum cumulative capacity not exceeding  $S_E$ , being awarded under the RfS.

44.5 In case the partial capacity offered to the last Successful Bidder as per Cl. 44.2 above, is lower than 50% of the total capacity quoted by such Bidder, the Bidder shall have an option to refuse such offered partial capacity. Such refusal shall be intimated to UPPCL within 7 days of completion of e-RA and not later than 7 days of issuance of LoAs by UPPCL, failing which, the awarded capacity shall be deemed to have been accepted by the said Bidder.

44.6 In case the partial capacity offered to the last Successful Bidder as per Clause 44.2 above, is greater than or equal to 50% of the total capacity quoted by such Bidder and is greater than 50 MW, it shall be mandatory for the last Bidder to accept the partial capacity offered against its quoted capacity, subject to the total cumulative capacity awarded under the RfS not exceeding  $S_E$ . In case the last Bidder refuses to accept such partial capacity offered by UPPCL, the e-Bank Guarantee(s) against EMD submitted by such Bidder shall be encashed by UPPCL.

**Note** - ‘Tariff’ mentioned in Clause 42 Financial Bid Evaluation, Clause 43 Reverse Auction and Clause 44 Selection of Successful Bidders may be read as ‘applicable tariff’.

#### 45 *Issuance of LoAs*

- a) At the end of the selection process, a Letter of Award (LoA) will be issued to the successful Bidders for each Project. In case of a Consortium being selected as the successful Bidder, the LoA shall be issued to the Lead Member of the Consortium.
- b) UPPCL reserves the right to annul the bid process without any financial implications to any of the parties concerned.
- c) In all cases, UPPCL's decision regarding selection of Bidder through Reverse Auction or other- wise based on tariff or annulment of tender process shall be final and binding on all participating bidders.
- d) In case of delay in signing of BEDPA beyond 6 months from the date of issuance of LoAs, or any other extended date as mutually agreed between UPPCL and the successful bidders, the awarded capacity shall stand cancelled.

## **4. Other Sub-systems/Components**

Other subsystems/components used in the BESS must also conform to the relevant international/national Standards for Electrical Safety for ensuring Expected Service Life and Weather Resistance.

## **5. Fire Protection**

The BESSD shall design and install a fire protection system that conforms to national and local codes. The fire protection system design and associated alarms shall take into account that the BESS will be unattended at most times. For high energy density technologies, the BESSD shall also obtain thermal runaway characterization of the battery storage systems.

## **6. Authorized Test Centres**

Batteries/ Power Conditioning Units deployed in the power plants must have valid test certificates for their qualification as per above specified IEC/ BIS Standards by one of the ILAC member signatory accredited laboratories. In case of module types/ BESS/equipment for which such Test facilities may not exist in India at present, test certificates from reputed ILAC Member body accredited Labs abroad will be acceptable.

## **7. Warranty**

BESSD shall procure performance guarantees from the OEM to ensure minimum performance levels for predefined application(s) as per the terms of the RfS. The Warranty shall clearly indicate life expectancy given discharge profiles provided for the application.

## **8. Performance Monitoring**

As part of the performance monitoring, the following shall be carried out:

- a) The BESSD must install necessary equipment to continuously measure BESS operating parameters (including but not limited to voltage, current, ambient conditions etc.) as well as energy input into and energy output from the BESS along with Metering arrangement in accordance with extant regulations. They will be required to submit this data to UPPCL online and/or through a report on regular basis every month for the entire duration of contract.
- b) The BESSD shall provide access to the UPPCL/MNRE or their authorized representatives for installing any additional monitoring equipment to facilitate on-line transfer of data.
- c) All data shall be made available as mentioned above for the entire duration of the Contract.
- d) The plant SCADA should be OPC version 2.0a (or a later version including OPC UA) compliant and implement appropriate OPC-DA server as per the specification of OPC Foundation. All data should be accessible through this OPC server for providing real time online data (BESS parameters) to the UPPCL/MNRE. This time series data shall be available from the Project SCADA system to facilitate monitoring and should include among others as stated before, below parameters to facilitate daily, monthly and annual Report for performance monitoring.

**SPECIAL INSTRUCTIONS TO BIDDERS FOR  
e-TENDERING AND REVERSE AUCTION**

General

The Special Instructions (for e-Tendering) supplement 'Instruction to Bidders', as given in these Tender Documents. Submission of Online Bids is mandatory for this Tender.

E-Tendering is a new methodology for conducting Public Procurement in a transparent and secured manner. Now, the Government of India has made e-tendering mandatory.

Suppliers/ Vendors will be the biggest beneficiaries of this new system of procurement. For conducting electronic tendering, UPPCL has decided to use the portal <https://www.bharat-electronictender.com> through ISN ElectronicTender Services Private Limited (referred as ISN- ETS). This portal is based on the world's most 'secure' and 'user friendly' software from ElectronicTender®. A portal built using ElectronicTender's software is also referred to as ElectronicTender System® (ETS).

Benefits to Suppliers are outlined on the Homepage of the portal.

Instructions

Note on ETS BD-CR:

In order to participate in this Tender, each Bidder would have to deposit towards 'Application Charges for Bidders' an amount equal to Rs 400/MW (Excluding GST) with the Service Provider of Bharat-Electronic Tender Portal [ETS], ie ISN Electronic Tender Services Pvt Ltd (ISN-ETS), as per instructions given on ETS. In ETS, this amount is referred to as 'ETS Bidding-Deposit Conditionally Refundable (ETS BD-CR)' and is calculated @ Rs. 400/- per MW plus GST for the Capacity for which the bidder is submitting the quote.

The amount can be paid online through the following methods:

1. SBI Payment Gateway facility available on ETS portal
2. NEFT/RTGS to the following account:

Beneficiary Name: ISN Electronic Tender Services Pvt. Ltd. A/C

No.: 661405601452

Branch: ICICI Bank, Central Arcade, DLF City, Phase-II, Gurgaon - 122002 IFSC

Code: ICIC0006614

Account Type: Current Account

On the 'Date of Bid Finalization', ie the date on which written communication is received by the Service/ Portal Provider of ETS from the Buyer Organization/ Auctioneer (ie UPPCL) about the successful/ unsuccessful Bidders, ETS BD-CR amount corresponding to the quantity allocated/ awarded to that successful Bidder will be retained by the Service/ Portal provider of ETS and treated as 'ETS Bidding-Fee' (including GST), and the balance amount (without any interest) will be refunded by Service/ Portal Provider.

Similarly, for unsuccessful Bidders, the full ETS BD-CR (without any interest) will be refunded within Seven (7) working days from the date of receipt of written communication by the Service/ Portal Provider of ETS from the Buyer Organization/ Auctioneer (ie UPPCL).

Invoicing & TDS deduction after the final outcome of the bidding process/ e-Auction:

Case-1 (Unsuccessful Bidder): In case the bidder does not win any capacity, the full BD-CR amount shall be refunded and therefore no invoice will be given and will not be subject to TDS.

Case-2 (Successful Bidder): In case the bidder wins a particular capacity, an invoice shall be generated @ 400/MW plus GST. The applicable TDS will be calculated on the invoice amount and ETS portal Service Provider shall then deposit this TDS amount on behalf of the bidder and share a copy of the deposit challan. Subsequently, the remaining BD-CR balance shall be refunded, if any.

Note: The bidder must email a copy of the transaction summary and TAN Number

to support@isn-ets.com with the "Subject: 'Bidders Name' - Payment for UPPCL Tender ETS-BDCR"

10. Participate in e-Reverse Auction on ETS

For participating in this tender online, the following instructions are to be read carefully. These instructions are supplemented with more detailed guidelines on the relevant screens of the ETS.

**Digital Certificates**

For integrity of data and authenticity/ non-repudiation of electronic records, and to be compliant with IT Act 2000, it is necessary for each user to have a Digital Certificate (DC), also referred to as Digital Signature Certificate (DSC), of Class-III, issued by a Certifying Authority (CA) licensed by Controller of Certifying Authorities (CCA) [refer <http://www.cca.gov.in>].

**Registration**

To use the ElectronicTender® portal <https://www.bharat-electronictender.com>, vendors need to register on the portal. Registration of each organization is to be done by one of its senior persons who will be the main person coordinating for the e-tendering activities. In ETS terminology, this person will be referred to as the Super User (SU) of that organization. For further details, please visit the website/portal, and click on the ‘Supplier Organization’ link under ‘Registration’ (on the Home Page), and follow further instructions as given on the site, and special instruction given in the RFP in this regard. Pay Annual Registration Fee as applicable.

After successful submission of Registration details and Annual Registration Fee, please contact ISN-ETS/ ETS Helpdesk (as given below), to get your registration accepted/activated

Important Note: To minimize teething problems during the use of ETS (including the Registration process), it is recommended that the user should peruse the instructions given under ‘ETS User-Guidance Center’ located on ETS Home Page, including instructions for timely registration on ETS. The instructions relating to ‘Essential Computer Security Settings for Use of ETS’ and ‘Important Functionality Checks’ should be especially taken into cognizance.

Please note that even after acceptance of your registration by the Service Provider, to respond to a tender you will also require time to complete activities related to your organization, such as creation of users, assigning roles to them, etc.

2. DD/ Bankers cheque of Rs ..... drawn in favour of , UPPCL, payable at Lucknow against payment of Bid Processing Fee.

Note: The Bidder should also upload the scanned copies of all the above-mentioned original documents as Bid-Annexures during Online Bid-Submission.

### Special Note on Security and Transparency of Bids

Security related functionality has been rigorously implemented in ETS in a multi-dimensional manner. Starting with 'Acceptance of Registration by the Service Provider', provision for security has been made at various stages in Electronic Tender's software. Specifically, for Bid Submission some security related aspects are outlined below:

As part of the ElectronicEncrypter® functionality, the contents of both the 'ElectronicForms®' and the 'Main-Bid' are securely encrypted using a Pass-Phrase created by the Bidder himself. Unlike a 'password', a Pass-Phrase can be a multi-word sentence with spaces between words (eg I love this World). A Pass-Phrase is easier to remember, and more difficult to break. It is mandatory that a separate Pass-Phrase be created for each Bid-Part. This method of bid-encryption does not have the security and data-integrity related vulnerabilities which are inherent in e-tendering systems which use Public-Key of the specified officer of a Buyer organization for bid-encryption. Bid-encryption in ETS is such that the Bids cannot be decrypted before the Public Online Tender Opening Event (TOE), even if there is connivance between the concerned tender-opening officers of the Buyer organization and the personnel of e-tendering service provider. This is an

additional reason why a Bidder using ETS need not take the risk of trying to submit his bid near the 'Last Date and Time o Receipt of Bids', and can comfortably do so well in advance.

CAUTION: All bidders must fill ElectronicForms® for each bid-part sincerely and carefully, and avoid any discrepancy between information given in the ElectronicForms® and the corresponding Main-Bid. For transparency, the information submitted by a bidder in the ElectronicForms® is made available to other bidders during the Online Public TOE. If it is found during the Online Public TOE that a bidder has not filled in the complete information in the ElectronicForms®, the TOE officer may make available for downloading the corresponding Main- Bid of that bidder at the risk of the bidder. If variation is noted between the information contained in the ElectronicForms® and the 'Main-Bid', the contents of the ElectronicForms® shall prevail.

Typically, 'Pass-Phrase' of the Bid-Part to be opened during a particular Public Online Tender Opening Event (TOE) is furnished online by each bidder during the TOE itself, when demanded by the concerned Tender Opening Officer.

(Optional Text depending upon the decision of UPPCL):

Additionally, the bidder shall make sure that the Pass-Phrase to decrypt the relevant Bid- Part is submitted to UPPCL Name in a sealed envelope before the start date and time of the Tender Opening Event (TOE).

There is an additional protection with SSL Encryption during transit from the client-end computer of a Supplier organization to the e-tendering server/ portal.

#### Other Instructions

For further instructions, the vendor should visit the homepage of the portal <https://www.bharat-electronictender.com>, and go to the User-Guidance Center

The help information provided through ‘ETS User-Guidance Center’ is available in three categories – Users intending to Register / First-Time Users, Logged-in users of Buyer organizations, and Logged-in users of Supplier organizations. Various links (including links for User Manuals) are provided under each of the three categories.

**Important Note:** It is strongly recommended that all authorized users of Supplier organizations should thoroughly peruse the information provided under the relevant links, and take appropriate action. This will prevent hiccups, and minimize teething problems during the use of ETS.

#### SEVEN CRITICAL DO’S AND DON’TS FOR BIDDERS

Specifically, for Supplier organizations, the following 'SEVEN KEY INSTRUCTIONS for BIDDERS' must be assiduously adhered to:

1. Obtain individual Digital Signing Certificate (DSC or DC) of Class-III, well in advance of your first tender submission deadline on ETS
2. Register your organization on ETS well in advance of the important deadlines for your first tender on ETS viz ‘Date and Time of Closure of Procurement of Tender Documents’ and ‘Last Date and Time of Receipt of Bids’. Please note that even after acceptance of your registration by the Service Provider, to respond to a tender you will also require time to complete activities related to your organization, such as creation of -- Marketing Authority (MA) [ie a department within the Supplier/ Bidder Organization responsible for responding to tenders], users for one or more such MAs, assigning roles to them, etc. It is mandatory to create at least one MA. This unique feature of creating an MA enhances security and accountability within the Supplier/ Bidder Organization.

3. Get your organization's concerned executives trained on ETS well in advance of your first tender submission deadline on ETS

4. For responding to any particular tender, the tender (ie its Tender Search Code or TSC) has to be assigned to an MA. Further, an 'Official Copy of Tender Documents' should be procured/downloaded before the expiry of Date and Time of Closure of Procurement of Tender

Documents. Note: Official copy of Tender Documents is distinct from downloading 'Free Copy of Tender Documents'. Official copy of Tender Documents is the equivalent of procuring physical copy of Tender Documents with official receipt in the paper-based manual tendering system.

5. Submit your bids well in advance of tender submission deadline on ETS (There could be last minute problems due to internet timeout, breakdown, et al)

Note: Bid-submission in ETS can consist of submission of multiple bid-components, which vary depending upon the situation and requirements of the Buyer. Successful receipt of a bid in an e-tendering scenario takes place if all the required bid-components are successfully 'received and validated' in the system (ETS) within the scheduled date and time of closure of bidding (On some ETS screens, this is also referred to as 'Last Date and Time of Receipt of Bids'). ETS/ Service Provider is not responsible for what happens at an end-user's end, or while a submission made by an end-user is in transit, until the submission is successfully 'received and validated' in ETS. When a bid-component receipt and validation is successful, it is recorded in the ETS Audit Trail Report, which is generated by ETS. In case of any uncertainty, the application audit trail generated by ETS (ETS Audit Trail Report) shall be the final record/evidence for reference regarding the 'successful bid receipt'.

6. It is the responsibility of each bidder to remember and securely store the Pass- Phrase for each Bid-Part submitted by that bidder. In the event of a bidder forgetting the Pass-Phrase before the expiry of deadline for Bid-Submission, facility is provided to the bidder to 'Annul Previous Submission' from the Bid-Submission Overview page and start afresh with new Pass- Phrase(s)

7. ETS will make your bid available for opening during the Online Public Tender Opening Event (TOE) 'ONLY IF' your 'Status pertaining Overall Bid-Submission' is 'Complete'. For your record, you can generate and save a copy of 'Final Submission Receipt'. This receipt can be generated from 'Bid-Submission Overview Page' only if the 'Status pertaining overall Bid-Submission' is 'Complete'.

NOTE:

While the first three instructions mentioned above are especially relevant to first-time users of ETS, the fourth, fifth, sixth and seventh instructions are relevant at all times.

Additional DO'S AND DON'TS FOR BIDDERS Participating in e-ReverseAuction

1. Get your organization's concerned executives trained for e-ReverseAuction related processes on ETS well in advance of the start of e-ReverseAuction.

2. For responding to any particular e-ReverseAuction, the e-ReverseAuction (ie its Reverse Auction Search Code or RASC) has to be assigned to an MA.

3. It is important for each bidder to thoroughly read the ‘rules and related criterion’ for the e-ReverseAuction as defined by the Buyer organization.

Note: To participate in e-ReverseAuction, the ETS Bidding-Fee for e-ReverseAuction should be paid before the ‘Date and Time of Start of Reverse-Auction’. In case ETS Bidding-Fee for e-ReverseAuction is sent offline to the Auctioneer or ETS Service Provider, it is important for the bidder to ensure that the Auctioneer/ ETS Service Provider has received the ETS Bidding-Fee for e-ReverseAuction and also entered the related details in ETS. When the Auctioneer/ ETS Service Provider enters the details, the bidder should receive an e-mail acknowledgement. If ETS Bidding-Fee for e-ReverseAuction status of the bidder is not updated as outlined above, the bidder would not be able to participate in the Auction.

4. During an e-auction, it is recommended that a bidder submits a bid well before the scheduled time of ‘Date and Time of Closure of Reverse-Auction’. Submission of a bid near the closing time of an auction may result in failure due to any of the various factors at that instant, such as – slow internet speed at the bidder’s end, slow running of computer at bidder’s end, nervousness of the bidder in the last few seconds, etc. This could lead to a delay in submission of data from the bidder’s computer to the server. Even if the delay is of a fraction of second after the scheduled closing time, it will result in failure of bid submission. Further, please note that a bid can be submitted even if the bidding page has not been refreshed manually, or otherwise depending on the conditions of the e-auction.

Note: Successful receipt of Bid in an e-auction scenario takes place if the bid is successfully ‘received and validated’ in the system (ETS) within the scheduled date and time of closure of bidding (On some ETS screens, this is also referred to as ‘Date and Time of Closure of Reverse-Auction’, or Forward-Auction, as the case may be). End Users shall be solely responsible for ensuring timely submission of their respective bids such that the bids are successfully received in ETS as stated above. ETS/ Service Provider is not responsible for what happens at an end-user’s end, or while a submission made by an end-user is in transit, until the submission is successfully ‘received and validated’ in ETS. When a bid is successfully ‘received and validated’, it is recorded in the ETS Audit Trail Report, which is generated by ETS. In case of any uncertainty, the application audit trail generated by ETS (ETS Audit Trail Report) shall be the final record/evidence for reference regarding the ‘successful bid receipt’.

5. It is important to digitally-sign your ‘Final bid’ after the end of e-Reverse Auction bidding event.

i is the  $i^{\text{th}}$  Timeblock in the day.

The System Availability for the day is calculated as the mean of **Column TA**, for all time- blocks where **Column Z is not zero**.

From the above table, Day's System Availability = 0.97

Similarly, the System availability shall be calculated for 2880 time-blocks (96\*30) in a month (e.g. for April month), excluding time-blocks where Grid is unavailable or in case of Force Majeure.

Assuming the following parameters:

- a. Total Contracted Capacity = 600 MWh (for 150 MW/ 600 MWh), **C**
- b. Quoted Tariff = x , **D**
- c. Monthly system availability (as per procedure above) is calculated to be 0.93, **B**
- d. n = 30

Liquidated Damages on account of shortage in annual system Availability, as calculated from formula provided in Clause 8.2:

$$\text{Liquidated damages} = (A - B) \times C \times 1000 \times D \times n \times 1.5$$

Assuming x = INR 7.00/ kWh

$$= (0.95-0.93) \times 600 \times 1000 \times 7.00 \times 30 \times 1.5$$

$$= 37.801$$

**Subject - Viability Gap Funding (VGF) Scheme for development of Battery Energy Storage Systems (BESS) supported through Power System Development Fund (PSDF).**

Sir/ Madam,

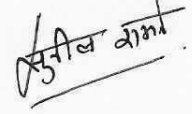

Considering the requirement of Energy Storage in the country, with the approval of Minister of Power, it has been decided to provide VGF to 15 number of States and NTPC (as per enclosed Operational Guidelines) @ Rs. 18 Lakhs per MWh for development of 30 GWh BESS capacity supported through PSDF, which amounts to total financial support of Rs. 5400 Crores from PSDF.

2. This allocation includes 25 GWh of BESS capacity allocated to 15 States to facilitate them in meeting their Energy Storage System requirements. In addition, 5 GWh of BESS capacity is allocated to NTPC, which is to be developed for optimum utilization of existing thermal generation and transmission infrastructure as well as to facilitate meeting non-solar hour electricity demand in a reliable and economic manner .
3. All the concerned States and NTPC are required to submit proposal to NLDC, the nodal agency for PSDF, as per the extant Guidelines / Procedure for funding of the projects under PSDF, within 30 days from the date of issuance of this letter.
4. This issues with the approval of competent authority.

**Guidelines for Viability Gap Funding (VGF) Scheme for  
development of Battery Energy Storage Systems  
(BESS) supported through Power System Development  
Fund (PSDF).**

**1. Introduction**

**1.1 Objective:** Development of 30GWh BESS capacity for deployment to ensure grid integration of RE and reliable electricity supply.

**1.2** Energy storage systems are essential for integration of variable renewable energy (vRE) sources in the electricity grid. With an installation target of 393 GW (293 GW Solar and 100 GW Wind) by 2030, vRE will constitute approx. 50% of the installed generation capacity by 2030.

**1.3** Increasing share of RE also necessitate flexible operation of thermal generation plants. The variability of renewable generation requires thermal generators to back down during periods of high RE availability, especially during solar hours. However, during evening peak hours, when solar generation is not available, thermal plants are essential to meet the evening peak. Therefore, BESS may also be installed with thermal power stations to leverage existing generation and transmission infrastructure efficiently.

**1.4** As per CEA, 37GWh BESS capacity is required by 2027 and the requirement will increase to 236 GWh by 2031-32. BESS capacity of 13.2 GWh has been approved under the ongoing VGF scheme for development of BESS.

**2 Scheme Overview**

**2.1 Viability Gap Funding (VGF):** VGF of Rs 18 lakh per MWh, shall be provided and is aimed at supporting a BESS capacity of 30 GWh.

**2.2 Scheme Budget:** This scheme has a budgetary allocation of Rs 5,400 Crore. The VGF shall be a non-recurring expenditure and

shall be fully funded from Power System Development Fund (PSDF). The disbursement of funds shall be as per procedure applicable for PSDF. The VGF for each project shall be disbursed to the Eligible Entity/ REIA, once CEA certifies the achievement of the disbursement schedule milestone and submission of the required BG.

**2.3 Commissioning Period:** The projects are required to be commissioned within a period of 18 months from the date of signing of Battery Energy Storage Purchase Agreement (BESPA) / Power Purchase Agreement (PPA).

**2.4 Eligible Entities:** State utilities or agencies authorized by States Governments or Central Government shall be eligible. (refer Annexure).

**2.5 Disbursement schedule:** The VGF amount to the eligible projects shall be disbursed in three tranches as detailed below.

Milestone	% VGF disbursed
On financial closure, subject to submission of bank guarantee.	20
On Commercial Operation Date (COD)	50
Completion of 1st year from COD	30
<b>Total</b>	<b>100</b>

**2.5 Storage Duration:** The BESS capacity should preferably be with 2-hour discharge duration and average 1.5 cycles in a day i.e within 24 Hour period. However, the Eligible Entity may vary the duration, no of cycles as required.

### 3. Implementation Model

**3.1. Bidding Process:** BESS projects shall be awarded using the Tariff Based Competitive Bidding (TBCB) process under section 63 of the Electricity Act, 2003.

**3.2 Contract Period:** The contract period shall be specified in the RfS document, in accordance with the BESS TBCB Guidelines. The contract shall be awarded on Build Own Operate (BOO)/ Build Own Operate Transfer (BOOT) basis preferably for a contract period of 12 to 15 years.

*[Handwritten signature]*

**3.3 Bidding Parameter:** Developers shall compete based on the annualized fixed cost they offer, expressed in rupees per Megawatt (MW) per Month or on Rs/kWh after factoring in the VGF specified in the RfS.

**3.4.** Eligible Entities are required to invite bids, either by themselves or through Renewable Energy Implementing Agencies designated by Central Government, following the bidding guidelines issued under section 63 of the Electricity Act, 2003. The BESPA / PPA shall be signed within 9 months from the date of issue of these guidelines, to be eligible for VGF.

**3.5** States / NTPC desirous of availing the VGF are required to submit their proposal to the Central Electricity Authority (CEA) within 60 days from the date of issue of these Guidelines, specifying the implementing agency, location(s) and size of BESS capacity planned for implementation for screening and approval for VGF funding through PSDF.

**3.6** The project may be connected at InSTS or ISTS. The land and InSTS grid connectivity shall be provided by the respective Eligible Entities.

**3.7** The payment security mechanism shall be as per Electricity (Late Payment Surcharge & Related matters), Rules 2022 as amended from time to time. CEA will monitor the implementation of the scheme as well as the progress of the awarded projects under the Scheme through a Management Information System (MIS) portal and submit monthly reports to the Ministry of Power. The monitoring parameters shall include details of physical and financial progress vis-a-vis the agreed milestones. The performance levels may also be verified by CEA on at least quarterly basis.

**3.8. Bank Guarantee:** The Eligible Entities/REIAs shall be required to obtain a Bank Guarantee (BG) of value equal to the VGF to be disbursed, prior to its release to the developer, as specified in the RfS. This BG shall be liable for encashment to recover the VGF amount in the event of non-fulfilment of the scheme conditions specified in the Bidding Documents. The BG for the VGF sanctioned up to COD may be released within one year of COD.

#### 4. Eligible Entity/REIA Responsibilities

- 4.1. The Eligible Entity/REIA shall be responsible for:
