-----------------------	---

- xiv) Based on the price ranking, the end user verification/confirmation of the PQR documents submitted by the bidders shall be carried out.
- xv) In case the documents of the bidder who offered lowest price (RL1/EL1) are found to be false/incorrect, the next lowest bidder's offer in their order of price ranking including the eliminated bidders, if any, will be evaluated for obtaining end user verification till a successful bidder is identified.
- xvi) During the above said evaluation process, in case, the documents of the bidder(s) are found to be false / incorrect, then the bid(s) of such bidder(s) shall be rejected and action of banning / suspension of such bidder(s) for a specific period shall be taken by the Purchaser.
- xvii) Bidders shall not be allowed to change/ modify weighted average Wp of PV module wattages, during entire bidding process including Reverse Auction in any case.
- xviii) After completion of the Reverse Auction event, successful bidder shall submit item wise price break up for Final Price after RA (INR) for the item under procurement to Purchaser as per the ratio quoted in original Evaluated bid price.
- xix) Bidder to note that the Final Total Price as per item wise detailed break-up (including taxes and duties) shall not exceed the Award Price to be calculated after completion of RA.

### 3.23 Detailed Evaluation Methodology for calculating the Evaluated bid price by system:

In line with the Technical Specification, the nominal power output Wp of the modules to be delivered shall be at least 580 Wp and above.

The bidder shall provide weighted average wattage of the modules. As the base module is being considered as "580 Wp module", Bidder's Bid Price shall be

decreased by a Bid evaluation factor considering the weighted average Wp of PV module wattages offered by bidder as given below;

De-loading factor w.r.t weighted average Wp of PV module wattages offered by bidder:

$$(\Delta X) = 49,62,242 * (Wp\_new - 580)$$

Where,

$$Wp\_new = (\Sigma (MWp \text{ offered for a particular Nominal Wp} \times \text{Nominal Wp})) / \text{Total MWp}$$

X = Quoted Bid Price

X - Δ X = Evaluated bid Price.

The Bidders will be ranked starting from the lowest Evaluated bid price (EL1) for the supply and increasing in the ascending order (EL1, EL2, EL3, ...).

Example:

Total Quoted Price for 410MW (AC)/579.74 MWp (DC) Rs. (X) = 600 Crores.

If 580Wp of 300MWp and 585Wp of 279.74 MWp is offered by bidder.

$$Wp\_new = ((580 * 300MWp) + (585 * 279.74 MWp)) / 579.74 MWp = 582.41$$

$$\text{De-loading factor } (\Delta X) = 49,62,242 * (582.41 - 580.00) = 1,19,72,070.04$$

Evaluated bid Price after De-loading factor for 410MW (AC)/579.74 MWp (DC) in Rs. = (X - ΔX) = 600,00,00,000 – 1,19,72,070.04 = 5,98,80,27,930/-

The Reverse auction will be conducted on the Evaluated bid price.

After reverse auction, the Award price will be calculated as given below:

Award Price = (Discovered price in RA (RL1)) + (De-loading factor w.r.t weighted average Wp of PV module wattages offered by the bidder) in Rs.

Without prejudice to PURCHASER'S rights on Price Reduction Clause thereof and to entitlement to amount accrued due to price reduction in terms thereof and in addition thereto, PURCHASER may at any time after the expiry of the stipulated date(s) of Delivery in respect of any Material(s)/ Equipment(s)/ Service(s), at its discretion, terminate in whole or part of the Purchase order in respect of the undelivered Material(s)/Equipment(s)/Service(s) or any of them and either purchase such Material(s)/Equipment(s)/ Service(s) from any other available source at the risks and costs of the SUPPLIER and recover from the SUPPLIER any additional cost incurred by PURCHASER on such purchase, or recover from the SUPPLIER without such purchase the difference between the market and purchase order price of such Material(s)/Equipment(s)/Service(s) on the date of termination of Purchase

order relative thereto. Provided, this shall not restrict PURCHASER'S claim for damages or compensation, as the case may be, for acts of fraud, deliberate default, negligence or misconduct by the SUPPLIER.

However any supply may be accepted beyond the delivery schedule strictly based on delivery extension obtained from the Purchaser, otherwise NLCIL/NIRL reserve the right to reject the material and cancel the purchase order at the risk and cost of the Supplier.

- b. Without prejudice to the foregoing rights, if such failure to deliver in time as aforesaid is due to any cause beyond the control of the supplier, such as acts of god, any acts of government, strikes, lockout or other concerted action of

Required Solar PV Module Capacity	579.74	Bi-facial

NIRL reserves the right to ask the Bidder to supply up to 30% additional Solar PV Modules on same price and terms & conditions as applicable for the main contract/purchase order till the completion of Supply of last lot or the completion of scheduled delivery period whichever is later.

For additional modules if required, a separate order/amendment will be issued with mutually agreed delivery period.

If the number of Modules works out to be with fraction for the Contracted Capacity or for any Capacity with respect to the Nominal Watt Peak Rating of the Modules, the same shall be rounded off to the next whole number and the Quantity of modules shall be supplied accordingly.

Example:

Contracted Capacity = 579.74 MWp

Nominal Rating of the Modules to be Supplied = 580Wp

Then, the Number of Modules to be supplied =  $(579740000/580) = 9,99,552$  (rounded off to next whole number).

Example 2:

Contracted Capacity = 579.74 MWp

Nominal Ratings of the Modules to be Supplied = 580 Wp for 300 MWp & 600 Wp for 279.74 MWp

Then, the Number of 580Wp Modules to be supplied =  $(300000000/580) = 5,17,242$  (rounded off to next whole number).

The Number of 600Wp Modules to be supplied =  $(279740000/600) = 4,66,234$  (rounded off to next whole number).

### 3.2. REQUIREMENT FROM BIDDER
